SHAHRIAR MAHMUD

Senior Software Engineer – AI Software Development | Software Architecture | Microservices & SaaS

+8801773071269 | shahriar.ruet14@gmail.com | linkedin.com/in/shahriar-ruet14 | Dhaka, Bangladesh

EXPERIENCE

Senior Software Engineer, AI Software Development

Inovace Technologies

09/2026 - Present | Bangladesh

Multi-tenant SaaS biometric attendance platform with embedded AI capabilities

- Building **AI features** into a multi-tenant SaaS biometric attendance platform serving enterprise customers
- Developing a **conversational assistant (chatbot)** over attendance, leave and workforce data so users can query records in natural language
- Designing **tenant-specific, customisable AI features** that let each customer tailor assistant behaviour, data scope and workflows
- Integrating **LLM services** with platform APIs – retrieval over tenant data, prompt design, guardrails and response evaluation
- Owning service design and architecture for attendance processing, device integration and reporting alongside the AI layer

Senior Software Engineer

RedDot Digital Limited

01/2024 - 08/2026 | Bangladesh

Mobile Financial Services (MFS) platform powering LENDEN, TeleCash and MyCash

- Architected and delivered a **27-microservice** MFS platform (LENDEN, TeleCash, MyCash) handling **~20M BDT** in daily transactions, with shared service modules reused across platforms
- Led backend engineering for LENDEN and TeleCash on Node.js, Java and Ruby on Rails, delivering high-availability financial services
- Built a multi-platform ecosystem: **2 web portals** (Angular back office, React.js user portal) and **6 Flutter mobile apps**
- Integrated **AI tooling** into daily engineering – LLM chat, custom skills, Model Context Protocol (MCP) servers and coding agents – for code review, test scaffolding and documentation
- Set **team standards for AI-assisted development**, pairing agent output with human review gates to keep regulated financial code correct and auditable
- Drove system design and code reviews, mentored engineers across development, QA and operations, and owned complex production incidents

Software Engineer

RedDot Digital Limited

07/2022 - 12/2023 | Bangladesh

Multi-category sales & distribution and eCommerce SaaS ecosystem

- Developed a multi-tenant SaaS platform supporting B2B sales & distribution and eCommerce order/delivery systems
- Built Ruby on Rails backend services enabling scalable tenant-level customisation, within a shared platform architecture powering multiple products from a single codebase
- Delivered a Next.js storefront and React.js back office against Ruby on Rails APIs

Software Engineer

Together Initiatives (p) Limited

03/2020 - 06/2022 | Bangladesh

Enterprise Workflow Automation

- Customised ProcessMaker (open-source BPM) to automate enterprise workflows for Robi Axiata
- Delivered **200+ digital workflows** with custom forms, business logic and system integrations, replacing manual internal business processes
- Automated reconciliation of aggregator transaction data, removing manual verification effort

TECHNICAL EXPERTISE

Architecture — Microservices, event-driven design with Kafka, Redis caching, service decomposition, shared service modules, high-availability flows

Backend & APIs — Node.js, Java / Spring Boot, Ruby on Rails, TypeScript, REST APIs

AI Engineering — LLM integration, chatbots and conversational assistants, retrieval over tenant data, prompt design and guardrails; MCP servers, coding agents; local models via Ollama

Data & Infrastructure — PostgreSQL, MySQL, Docker, Kubernetes, CI/CD pipelines, multi-repo Git workflows

Frontend — Angular, React.js, Next.js – back-office consoles, storefronts and user-focussed portals

Domain — Multi-tenant SaaS, biometric attendance, Mobile Financial Services, digital wallets, settlement & reconciliation, eCommerce, BPM/RPA

SUMMARY

Senior Software Engineer with **7 years** building large-scale FinTech, MFS and SaaS platforms, on a pathway toward **software architecture**. Architected a 27-microservice MFS platform carrying high-volume transactions, and now designs the AI layer and backend services for a multi-tenant SaaS biometric attendance platform. Strong in microservices and event-driven architecture, service decomposition, distributed systems and technical leadership.

STRENGTHS

Leadership & Collaboration

Technical leadership, clear communication, cross-team collaboration, conflict resolution, ownership and accountability.

KEY ACHIEVEMENTS

Platform Architecture at Scale

Architected a 27-microservice MFS platform (LENDEN, TeleCash, MyCash) carrying **~20M BDT** in daily transactions with zero settlement mismatch.

AI-Accelerated Delivery

Brought LLM chat, custom skills, MCP servers and coding agents into day-to-day delivery, shortening code review, test and documentation cycles with human verification in the loop.

SKILLS

Software Architecture | System Design | Microservices | Event-Driven | Kafka | Redis | Distributed Systems | Technical Leadership | Java | Spring Boot | Node.js | TypeScript | JavaScript | REST APIs | PostgreSQL | MySQL | Docker | Kubernetes | Angular | React.js | Next.js | CI/CD | AI Software Development | Chatbots | AI Agents | LLM Integration | Prompt Engineering | MCP | FinTech & MFS | Multi-Tenant SaaS | E-Commerce

OTHER PROJECTS

Automation & Value-Added Services

- Built and maintained a Value-Added Services portal for service management and reporting
- Automated financial reconciliation processes, streamlining data verification
- Designed and deployed RPA solutions for repetitive network management tasks

EDUCATION

Bachelor of Computer Science and Engineering

Rajshahi University of Engineering & Technology (RUET)

01/2015 - 02/2020 | Rajshahi, Bangladesh

Science (SSC & HSC)

Chapila High School & Rajshahi City College

01/2010 - 12/2014 | Rajshahi, Bangladesh
